Weather Forecasting · Environmental Consulting · Climate Impact

The U.S. has sustained 338 weather and climate disasters since 1980 which were responsible for approximately 15,689 deaths, and damages costing over \$2.295 trillion (including CPI adjustment to 2022.) Our global community is dealing with complex and delicate environmental matters, yet public avoidance of these issues has been an ongoing challenge. Why?

For one, weather-related issues can be complex and overwhelming, They have been greatly marginalized as weather forecasts, weather apps, and climate commentary have been over-simplified, offering the very low end of environmental variables. The public urgently needs a source for reliable and verified, real-time critical Weather, Environment and Climate consulting.

Earth Chattering is a Weather Forecasting and Environmental Consulting firm committed to growing with the environmental goals of any business, community, city. We provide detailed and accurate weather forecasts, environmental consulting, and climate impact reports.

Company Snapshot

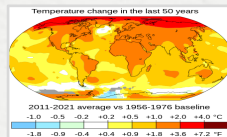

Business POC: Erika Martin-Dobensky, MBA, CBM
